

SESSION 7

Jeisson Pachon

Bryan Hernandez

Oscar Escobar

Ronald Niño

VIRTUAL CALL SCRIPT 1

Project Manager(Ronald): "Good morning, team. Welcome to today's daily stand-up. Let's start by quickly reviewing our agenda.

Remember to keep your updates concise and focus on the three questions:

What did you accomplish yesterday?

What are your plans for today?

Any obstacles or challenges?"

Developer 1 (Jeisson): "Thanks, Ronald . Yesterday, I defined the database entities and their relationships and I have started the Database creation. Today, I'm planning to continue working on the database creation. Yes, I have some issues with the table's relationships but I could overcome the problems."

Developer 2 (Bryan): "Thanks, Ronald . Yesterday, I filled a lot of registers of some tables of the database, created by Jeisson. Today, I'm planning to work on the database registers to populate the database. Yes, I have problems with the data because the registers

come with some trash and is necessary to clean the information up and this task takes much time.

Designer(Oscar): Hey team, I finished the first version of the checkout mockups yesterday using Figma. Today, I'll be polishing the design and making it work well on different screen sizes. The main challenge right now is keeping everything looking consistent, especially with fonts and spacing.

Project Manager: "Great updates, everyone. It sounds like we're making good progress. If you need any assistance or if there are any issues blocking your work, feel free to reach out to me or your teammates. Let's continue collaborating and moving forward. Our next meeting will be at the same time tomorrow. Thank you all for your contributions."
